

COMPONENT DETAILS

Bund

Impervious zone · repair of existing bund · 1 surveyed section · crest 6.00 m · U/S 1:2.00 · D/S 1:2.00 · TBL 100.00

Bund arrangement

Diagrammatic section at the tallest chainage, Ch 0, showing every element that is switched on and where it sits. It is a sketch of the assembly — each element is dimensioned on its own detail in the pages that follow.

Jungle clearance IRR-PMW-1-2

|                |      |      |
|----------------|------|------|
| Total quantity | 0.00 | sq.m |
|----------------|------|------|

Zoned embankment

The section is placed in two zones — an impervious hearting core carrying the water load, and the outer casing around it. Each is measured and billed separately; together they make up the formation volume for the section.

Casing zone IRR-DAW-5-6

|                |      |     |
|----------------|------|-----|
| Total quantity | 0.00 | cum |
|----------------|------|-----|

Hearting zone (impervious) IRR-PMW-3-8

|                |      |     |
|----------------|------|-----|
| Total quantity | 0.00 | cum |
|----------------|------|-----|

Berm — D/S berm at RL 97.500

A berm generates no earthwork item of its own: the shelf is part of the proposed design face, so the fill that forms it is already measured inside the formation quantity. Only what is placed on the shelf is billed here.

|             |            |   |
|-------------|------------|---|
| Shelf RL    | 97.500     |   |
| Shelf width | 3.00       | m |
| Cross-fall  | 1 in 40.00 |   |
